4. Strive for Transparency - Better, Faster, Lighter Java ...

Better, Faster, Lighter Java is a little different from the traditional Java/J2EE books, and is written in a conversational, rather than a technical style. Better, Faster, Lighter Java book by Bruce Tate Many Enterprise Java developers, accustomed to dealing with Java's spiraling complexity, have fallen into the habit of choosing.

Better Faster Lighter Java Tate

Better, Faster, Lighter Java sounds the clarion call for better code writing, project management, and maintenance. The authors also include chapters on other open-source products, such as Hibernate and Spring, which can help keep the code clean and build projects using a container model like EJB without all the unnecessary overhead.

Amazon.com: Customer reviews: Better, Faster, Lighter Java

Java apps are lighter and more compact, even when compared to Kotlin apps, resulting in a faster app experience. Java yields a faster build process too, letting you code more in less time. Thanks to the accelerated assembly with Gradle, assembling large projects becomes easier in Java.

Java has many IDEs but two of the most popular ones are NetBeans and Eclipse. NetBeans is an open-source, free Java IDE with a modular architecture. It has a multi-language editor, debugger, profiler, versioning control, and developer collaboration. Eclipse is an open-source and free IDE with a modular architecture. It is the most popular Java IDE.

A brief comparison of Java IDE's: NetBeans Vs Eclipse ...

Better integration with Java methods. Better way to use multi-threading. Functions for web access. A GUI. An applet version available over the web. Add BigInteger or BigDecimal numbers. Or maybe a new LongRational class. Make everything 10 to 50 times faster (I hope) by pre-treating expressions before evaluating. R 5 RS support.
