prone. Boost.Asio is an O-O C++ library that is, just like raw Sockets API, built around the concept of a socket. Roughly speaking, Boost.Asio wraps raw Sockets API and provides the developer with O-O interface to it.

Boost.Asio C++ Network Programming Cookbook

Network programming.
Even though Boost.Asio

Get Free Boost Asio C Network Programming

can process any kind of data asynchronously, it is mainly used for network programming. This is because Boost.Asio supported network functions long before additional I/O objects were added. Network functions are a perfect use for asynchronous operations because the transmission of data over a network may take a long time, which means
