Drugs Principles And Practices

Self-preservation is a behavior or set of behaviors that ensures the survival of an organism. It is universal among all living organisms. [citation needed] Pain and fear are integral parts of this mechanism. Pain motivates the individual to withdraw from damaging situations, to protect a damaged body part while it heals, and to avoid similar experiences

Drugs Principles And Practices

Preserving botanical formulations naturally can be quite a challenge. Since the demonisation, bans and restrictions on some commonly used preservatives, scientists have had to think creatively about how they preserve cosmetics. As a result there has been growing interest in preservative free and self-preserving methods.
