VISI Modelling - Powerful Surface Modelling & Solid Modelling Software. VISI Modelling is the foundation of all VISI products and provides a robust and powerful solid and surface modelling system based around the industry standard Parasolid® kernel. Combined with Hexagon's surface technology, model analysis and 2D design, VISI Modelling offers complete flexibility to construct, edit or repair the most complex 3D data.

In recent years, Vero has redeveloped its range of systems to integrate new technology (such as VISI Flow for injection moulding simulation) and to bring its software up to speed. Today, VISI is a fresh and modern looking system that has some serious power beneath a very shiny exterior. So let's have a look at what's new.

Vero's VISI 17: Design - DEVELOP3D

All areas of moulded component creation can benefit from the optimisation of mould tool design and moulding process parameters. Part designers, mould makers and moulders will all benefit from using Vero's innovative technology for injection simulation to achieve cost effective and reliable mould designs and the optimum moulding conditions.
